

TAYLOR BAILEY

UX // UI // FRONT END // GRAPHIC DESIGN // ART

PROFILE

I love creating experiences that people will remember, whether they be from a smooth scroll, an inviting button, an intuitive swipe, or icons and animations that delight and engage. I want to help your website, application, or product say what you want to say in a way that best serves your users. I enjoy new challenges, forming strong, lasting relationships, and inspiring anyone around me to give it their all.

EXPERIENCE

UX Designer/ Front-End Developer

Nashville Software School | January 2018-Present

Six month, full-time, hands-on, project-oriented software development bootcamp focusing on front-end development and UI/UX fundamentals.

Development

- ◆ Daily HTML/CSS/JS exercises and group projects
- ◆ Source version control & project management with GitHub
- ◆ DRY, modular JavaScript fundamentals
- ◆ jQuery DOM manipulation and AJAX calls
- ◆ Single page apps using React components
- ◆ Grunt, JSHint, Browserify, SASS
- ◆ Bootstrap, Materialize, CSS Grid, & Flexbox
- ◆ Deployed applications through GitHub
- ◆ Utilize .gitignore to safely store API keys

User Experience Design

- ◆ Discover: User research, affinity clustering, journey & empathy mapping, persona
- ◆ Define: Challenge & job statements
- ◆ Design: Site mapping, Information architecture, style guide, and wireframes or prototypes
- ◆ Deliver: Develop a viable product

EDUCATION

Tennessee Technological University

Nursing | Chemistry

COMMUNITY

Hack for the Community 2018

Front-End/UX Volunteer
Siloam Health

PROJECTS

Pantry

A single-page mobile application built with jQuery that allows users to search for recipes using any ingredient they can think of. The app manipulates data received by various AJAX calls to the Spoonacular API, which allows users to view recipe names, images, ingredients, and cook time in readable, accessible augmented Bootstrap styling. They can also view and delete saved recipes, which will update in real time using a flat database structure in Firebase.
